♦ main ingredients & effect	 <p>rose water : 100 % pure destilled flower water – our flower waters (hydrolates) are absolutely natural and pure. They are a precious and valuable substitute for water in our products and/or can be used as a luxurious supplement in skin care in general. Flower waters are being extracted by the distillation of essential oils. Bulgarian Damascene rose water is of especially high quality through multiple destillation. This flower water can contain up to 2.5% essential oils and thus has a wonderful, light and sweet rose scent. Rose water has been used in cosmetics, in medicine and the art of perfumery since antique times. Naturally extracted Bulgarian rose water from the Damascene Rose is of highest standard qualities and appreciated world-wide.</p>
