♦ Active Agents and Effects	<p>Conditioners are very suitable for a regular use of hair and make them very supple and soft to the touch.</p> <p>The Birch Avocado hair conditioner has what it takes to be a perfect and effective hair treatment. It enhances the metabolism of the scalp, hair turns shiny and soft and is scented sustainably fresh and healthy, as especially after washing your hair, it might appear unmanageable. The reason: water and the friction while washing roughen up the cuticle of the single hair and as therefore more easy to damage during the brushing process.</p> <p>A conditioner or treatment nourishes the external cuticular layer with proteins and caring agents which donate more suppleness and ease up the surface the hair. As the conditioner will embrace each single hair like a protective film the comb will get through the wet hair much easier and this protective film will keep on until the next washing like an invisible protection to make the hair stronger against external impacts.</p>
