The salt from these waters have an exceptionally high content of various health supporting minerals such as calcium and magnesium thus rendering it a most effective and nourishing agent for the skin. In addition to its other valuable qualities it also has a calming and cell renewing and anti aging effect on the skin by protecting its natural moisture on its surface.</p> <p>Macadamia Nutoil: an oil which is easily absorbed by the skin. Treating the skin with this oil makes it soft, smooth and supple leaving the skin surface non greasy. Its rich content of palmitoleic acid (25%), an acid very similar to the bodies own fatty acids makes it so well compatible to the skin.</p>
